

WavePart MATLAB and Python Comparison

This report compares representative WavePart outputs generated from the bundled sample dataset at indices 1 and 287. Each section shows the MATLAB and Python renderings of the same partition result in Cartesian, 3D, and polar form.

Case 1

Figure 1: MATLAB surface view for index 1.

Figure 2: Python surface view for index 1.

Figure 3: MATLAB polar view for index 1.

Figure 4: Python polar view for index 1.

Figure 5: MATLAB 3D view for index 1.

Figure 6: Python 3D view for index 1.

Case 287

Figure 7: MATLAB surface view for index 287.

Figure 8: Python surface view for index 287.

Figure 9: MATLAB polar view for index 287.

Figure 10: Python polar view for index 287.

Figure 11: MATLAB 3D view for index 287.

Figure 12: Python 3D view for index 287.
